

SG GREEN PLAN 2030

Sustainable Living

Go green: Live sustainably. Reduce, Reuse, Recycle.

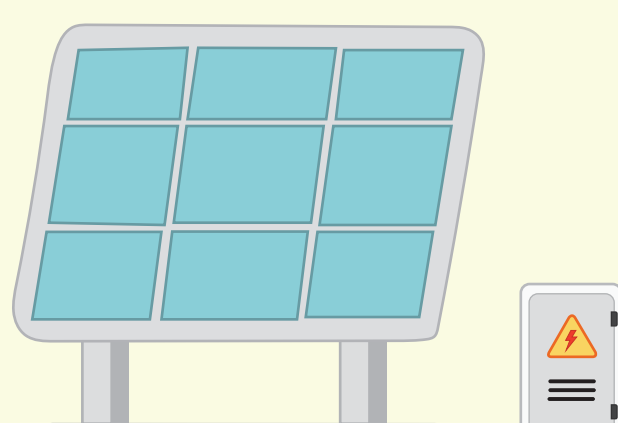

Reduce your carbon footprint and embrace eco-friendly living in Singapore by hopping on public transport, cycle, or walk.

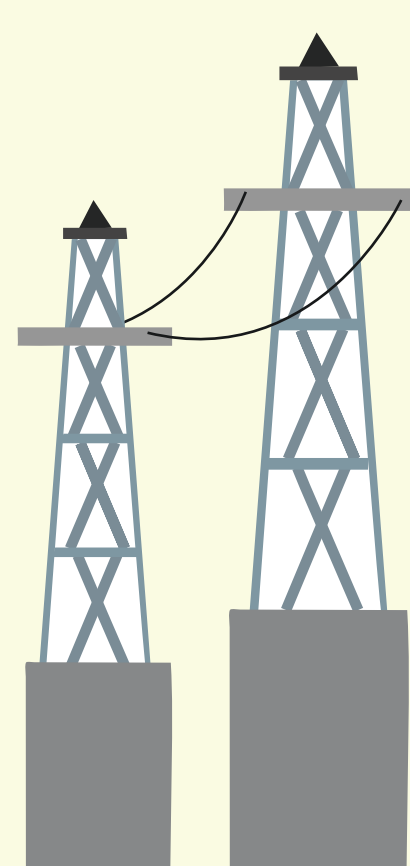

Energy Reset

Embrace solar power for a brighter tomorrow in Singapore. With innovative projects like the 60MW Tengeh Reservoir solar farm, we're leading the way towards a sustainable energy future

As our transport system expands, prioritizing environmental sustainability becomes crucial.

Connecting to regional power grids opens doors to cleaner energy sources beyond our borders.

Invest in green, Reap the rewards
Go green, grow economy
Sustainability fuels our economy
Economic Growth,
Environmental Stewardship
Green is the new gold
A green economy for a greener future

Resilient Future

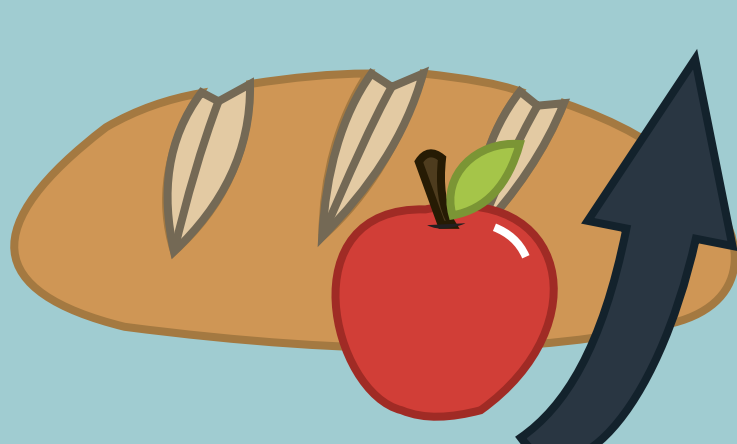

Shoring up our coastal and flood defense

To combat rising sea levels, Singapore is employing a multi-faced approach, including developing a Coastal-Inland Flood Model, exploring engineering solutions with nature-based enhancements, and conducting site-specific studies in vulnerable areas like City-East Coast, Jurong Island, and the north-west coast.

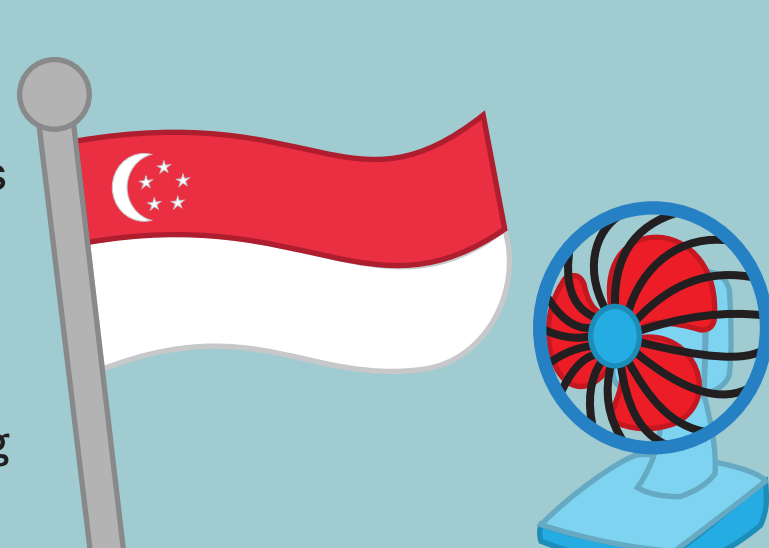

Strengthening food security

Announcing our 30x30 target: 30% of nutritional needs produced locally by 2030. Join us in building a resilient food supply! Learn about our \$60M ACT fund and initiatives for sustainable fish farming. Let's create a greener, self-sufficient Singapore together!

Keeping Singapore Cool

To combat rising urban temperatures, Singapore is increasing greenery and piloting cool paint on buildings. Mitigation efforts include deploying a city-wide climate sensor network, conducting research like Cooling Singapore 2.0, and partnering with industries and the public to implement a UHI mitigation action plan.

Expand the nature park network

Intensify nature in garden and parks

Restore nature into the urban landscape

Strengthen connectivity between Singapore's green spaces

Enhance veterinary care animal management

Transforming Singapore into a City in Nature
